

Presentation notes from week 2 Feb 13

Q. What did they enjoy/like about the design?

- Shareable visual on Daniel's design with combination of details, summary and source from Yuval & Shivam's Data Page design
- Half wheel idea of Val is more feasible in real world because of words(orientation)
- Dynamic Images(logo) from Yuval's design to inspect what the customer wants to see next
- Download and Share is a good idea
- SDGs that are related to more than one topic and navigate to other one if needed

Q. What did they not like about our designs?

- Nothing

Q. Sitemap- Linear or Interconnective?

- Use interconnectivity when needed. For example, there might be a topic that is connected to more than one SDG or vice versa.

Q. Language – Bilingual?

- Not the topmost priority but a feature that is good to have.
- Customers can also use google translate to read in other languages if needed.

Things we have they mentioned

- Categorize pinwheel by category rather than SDG as it may overwhelm user
