- Daniel Johnson
- Shivam Jigneshbhai Soni

Project Details / Background
- A Database Website detailing Regina's current statistics on the UN's 18 Sustainable Development Goals
- Currently statistics and data for Regina is all over the place and can be outdated, a centralized website that summarizes and provides all the data will help NGOs, government officials, and more in addressing these issues and making more clear plans for future projects
- Showcase where Regina is doing well in terms of the Sustainable Development Goals and where improvement is needed

Northstar Customer
- Government Officials/Workers - with more data available at the ready and showcased in the right way, can help enact more change

Carryover Customers
- NGO's - Further data to help the NGO spread awareness, apply for funding, develop further projects, and recruit new members
- People looking to help or join NGOs - Data can help showcase where Regina needs help, further development into the website could make a database of NGOs working on certain issues in the city
- Public looking to move - Anyone looking to move to Regina, this data could convince them by showcasing where Regina is doing well in the 18 Sustainable development goals.
- General Public Use - Data that can be easily shared within seconds to things like instagram, facebook etc. provide them with data and something to interact with. Providing links to places that you can help in the community or government websites.

Project Assumptions
- Utilize Wordpress
- All Data we require is provided for us
- To utilize one theme that is consistent over the entire website.
- To use a use-centered design approach, which involves engaging with the end-users

Project Constraints
- Free version of Wordpress will allow for our design goals for the website
- This project relies on the availability and quality of existing data, which may not be consistent, accurate, or up-to-date
- Certain deadlines to be met for the class
- No financial support of any kind
